

## CRESTED BUTTE QUARTERLY MARKET UPDATE

Both of these charts are showing growth in the Crested Butte area markets. At a glance you will notice that number of sales quarter over quarter are on the rise with a 53% increase from quarter 1 to 2, and a 24% raise from quarter 2 to 3 in total units sold. If you are looking at the average days on market, this number is dropping. This is a good sign as it is taking homes less time to sell. Dropping a total of 18% from quarter 1 to quarter 3. With this steady increase we could finish out 2016 with a bang. Taking a look at the second chart you will see a huge jump in the total sales volume from quarter 1 to quarter 2; a 49% increase. There was a .03% increase from quarter 3 to quarter 4; it will be interesting to see what happens in quarter 4.
